Company Overview

02

Who We Are

LaBrain provides integrated medical equipment solutions supporting healthcare facilities throughout the equipment lifecycle – from supply and installation to testing, maintenance, performance verification, inspection, and technical support.

Our Mission

To support healthcare providers with dependable medical equipment solutions focused on performance, safety, reliability, and long-term operational value.

Our Vision

To become a trusted technical partner for medical equipment solutions and lifecycle support in Saudi Arabia.

Reliable Equipment.
Reliable Healthcare.

Core Services

03

Supply & Distribution

Supply of medical equipment, accessories, components, and related technical solutions according to client requirements.

Installation, Testing & Commissioning

Professional installation, functional testing, configuration, commissioning, and handover support.

Preventive & Corrective Maintenance

Scheduled preventive maintenance and responsive corrective maintenance designed to minimize equipment downtime.

Calibration & Performance Verification

Technical verification of equipment performance and calibration support according to applicable requirements and equipment specifications.

Inspection, Audit & Compliance Services

Structured technical inspections, equipment condition assessments, documentation reviews, and compliance-support activities.

Safety Testing & Risk Assessment

Technical safety inspections, equipment risk assessment, and identification of potential operational or performance concerns.

From Supply to Lifecycle Support.

Technical Assurance

04

Technical Reporting, Quality Assurance & Safety Documentation

- Equipment inspection findings
- Technical condition reports
- Performance verification results
- Maintenance reports
- Safety observations
- Quality documentation
- Technical recommendations
- Corrective-action recommendations
- Equipment status reporting

Technical Consultancy & Support Services

Technical support for healthcare organizations requiring assistance with:

- Equipment assessment
- Technical specifications
- Equipment selection support
- Installation planning
- Maintenance planning
- Technical troubleshooting
- Lifecycle recommendations
- Reimbursement planning

Documented. Traceable. Technically Driven.

End-to-End Equipment Support

05

- 01 Assessment & Planning**
Understanding technical, operational, and facility requirements.
- 02 Supply**
Equipment and technical solution sourcing.
- 03 Installation**
Professional installation and system preparation.
- 04 Testing & Commissioning**
Functional verification before operational handover.
- 05 Preventive Maintenance**
Planned servicing to support reliability and reduce downtime.
- 06 Corrective Maintenance**
Troubleshooting, repair, and technical intervention.
- 07 Inspection & Performance Verification**
Review of equipment condition, functionality, and performance.
- 08 Technical Reporting**
Clear documentation of findings, actions, and recommendations.

One Technical Partner. Every Stage.

Healthcare Sectors We Support

06

- Hospitals
- Medical Centers
- Clinics
- Diagnostic Centers
- Laboratories
- Day Surgery Centers
- Rehabilitation Centers
- Specialized Healthcare Facilities
- Healthcare Projects
- Medical Equipment Operators

Supporting Healthcare Through Engineering.

Why LaBrain

07

Engineering-Driven Approach
Structured technical processes built around equipment performance and reliability.

Integrated Services
Supply, installation, maintenance, inspection, reporting, and technical support through one partner.

Quality-Focused Execution
Clear procedures, documentation, and attention to technical detail.

Safety-Oriented Approach
Equipment condition and operational safety remain central to our technical work.

Responsive Technical Support
Practical support focused on reducing downtime and resolving technical issues efficiently.

Professional Documentation
Clear technical reports providing clients with visibility into equipment condition, actions performed, and recommendations.

Client-Focused Service
Solutions structured around each healthcare facility's operational and technical needs.

Reliability. Safety. Performance.
